**Correspondences:**

Amalgam Separator Installation forms are required by NYS DEC and must be returned to them by 2008.

**Sewer Treatment Plant Report:**

We have been having a difficult time obtaining the grain bin company to find out what the delay is. It appears they are having difficulty obtaining the materials to construct the bins. David has been working with a company in Auburn to get a price and time frame if they were to provide a grain bin for us.

**Financial Report:**

**District Counsel:**

Sent a letter to the new Seneca Meadow owners with regard to infiltration problem. We included prior letters with regard to the same subject. The company assured us this would be taken care of. Jim explained the storm waters are running into the sewers causing infiltration.

Joan explained her board refuses to allow the people at the end of Lakeshore Landing to hook in. Jim explained to Joan that these people are in our district and it was agreed upon years ago that we would allow Varick to hook into our sewer with the understanding anybody in our district would be able to hook in after we disconnect the old line. Jim also explained that it was designed to accept these hookups and it was the intent from the start. This was part of the agreement when the district allowed Varick's line to hook in. These residents are in district and not part of Varick's out of district users.
